*Sanokil Medical Disposal Unit is specially designed for all locations. They represent the ideal solution for all types of medical waste.*

Sanokil Medical Disposal Unit contains extra strong Granules, so as medical waste is dropped into the unit, it is enveloped in a powerful sterilising vapour, which destroys infectious germs and eliminates unpleasant odours.

They are used for waste that has the potential to cause disease or infection. Waste contaminated with blood or bodily fluids may include: bandages, dressings, gloves etc. found in surgeries, nursing homes, hospitals etc.

- Regular container exchange service
- Suitable for doctors, surgeries, nursing homes and hospitals dental and veterinary clinics provision of appropriate bin.
- Provision of appropriate bin
